

Attn: All Mazda MX-5 Cup Teams

Starting with the Mid-Ohio IMSA event on May 13th-16th, Flis Performance will no longer be providing the at-car data download service. In exchange, Flis Performance will be providing the following for improved efficiency within the paddock:

- Each car will be provided a dedicated Flis Performance memory stick during tech inspection. Replacement memory sticks are \$10 if needed.
- Each MX-5 Cup team will be responsible for providing both **AiM and Bosch Chassis** data to the Mazda / Flis CEC trailer in a timely fashion, if requesting review.
- Reviews will be on a first come / first serve basis.
- Teams are responsible for the memory stick and its contents.
- Bosch and AiM Data review is **not** mandatory unless requested by a Series Official or Flis Performance. In that instance, Flis Performance will download all necessary data.
- Mazda and Flis Performance provide this review service as a courtesy and at no time will be held responsible for recommendations.
- **All impounded cars will be downloaded by Flis Performance during Tech Inspections. Teams will only be able to download their data once they are released from Tech.**
